

SafetyNet Training Webinars

4/5/2022 10am-12pm - **Hazard Recognition and Accident Prevention for Community Colleges Part 1**. In this session we will discuss basic safety principles that could affect community college employees. Primarily concentrating on Bloodborne Pathogen Awareness and Hazard Communication but will touch on Fall Prevention (Walking Working Surfaces and Ladder Safety)

4/19/2022 10am-12pm - **Hazard Recognition and Accident Prevention for Community Colleges Part 2** In this session we will discuss basic safety principles that could affect community college employees. Primarily concentrating on Personal Protective Equipment, Spill Response, Electrical Safety, Fire Prevention and Extinguishers

5/3/2022 10am-12pm - **Hazard Recognition and Accident Prevention for Community Colleges Part 1**. In this session we will discuss basic safety principles that could affect community college employees. Primarily concentrating on Bloodborne Pathogen Awareness and Hazard Communication but will touch on Fall Prevention (Walking Working Surfaces and Ladder Safety)

5/17/2022 10am-12pm - **Safety Overview for Custodial Staff** This session will concentrate on preventing employee injuries and illnesses caused by a variety of custodial tasks. This two hour session will be a combination training of Hazard Communication, Blood Borne Pathogens Awareness, Slips/Trips/Falls Prevention, Ladder Safety, Personal Protective Equipment and Electrical Safety.

6/7/2022 10am-12pm - **Hazard Recognition and Accident Prevention for Community Colleges Part 2** In this session we will discuss basic safety principles that could affect community college employees. Primarily concentrating on Personal Protective Equipment, Spill Response, Electrical Safety, Fire Prevention and Extinguishers

6/21/2022 10am 12pm – **Chemical Hygiene and Laboratory Safety** - This webinar covers best practices for lab safety as required by OSHA 1910.1450. Attendees will learn about some of the most common hazards and safety violations found in CC science labs. In addition, employees will learn how to properly label chemicals and how OSHA's Hazard Communication standard applies to their area. Attendees will also receive a basic introduction to hazardous chemical spill cleanup and response.

Summer 2022- EHSI is available to do onsite training including but not limited to Forklift training and Assessments, Hands-On Fire Extinguisher training for current and new employees, or customized training for your community college Professional Development Day. Virtual training in July via SafetyNet is available upon request.

8/2/22 10am-12pm - Hazard Recognition and Accident Prevention for Community Colleges Part 1 In this session we will discuss basic safety principles that could affect community college employees. Primarily concentrating on Bloodborne Pathogen Awareness and Hazard Communication but will touch on Fall Prevention (Walking Working Surfaces and Ladder Safety)

8/16/22 10am-12pm - Hazard Recognition and Accident Prevention for Community Colleges Part 2 In this session we will discuss basic safety principles that could affect community college employees. Primarily concentrating on Personal Protective Equipment, Spill Response, Electrical Safety, Fire Prevention and Extinguishers

9/6/22 10am-12pm Hazard Recognition and Accident Prevention for Community Colleges Part 1 In this session we will discuss basic safety principles that could affect community college employees. Primarily concentrating on Bloodborne Pathogen Awareness and Hazard Communication but will touch on Fall Prevention (Walking Working Surfaces and Ladder Safety)

9/12/22 10am-12pm Hazard Recognition for Vocational Trades Instructors Hazard Recognition for Skilled Trades Instructors will focus on identifying and eliminating hazards commonly found in CC shops in order to prevent injuries to instructors and students in the vocational curriculum. This two hour session will cover Electrical Safety, Fire prevention, chemical labeling and storage, machine guarding, and Ladder safety.

10/4/22 10am-12pm Hazard Recognition and Accident Prevention for Community Colleges Part 2 In this session we will discuss basic safety principles that could affect community college employees. Primarily concentrating on Personal Protective Equipment, Spill Response, Electrical Safety, Fire Prevention and Extinguishers

10/18/22 10am-12pm - ARC Flash and Electrical Safety This session will cover the basics of electrical safety and recognizing potential hazards in the workplace. Electrical Safety is focused on safety related work practices from Subpart "S". Training will include Arc Flash Awareness and will discuss the NFPA 70E 2015 standard, what an arc flash is, and proper work procedures and PPE to protect electrical workers. An arc flash is the dangerous explosive release of electrical energy caused by an electrical arc due to either a phase to ground or phase to phase fault. The explosive energy released can consist of heat, pressure wave, vaporized metal (plasma) molten metal and shrapnel. It is imperative that the proper PPE, tools, and work practices are implemented.

11/1/22 10am-12pm **Safety Overview for Office Personnel with Holiday Decorating Safety** This webinar includes Fall Prevention, Electrical Safety, Fire Prevention and Holiday Decorating Safety

11/15/2022 10am-12pm **Office Ergonomics** This session will cover principles that will help you create a comfortable and safe workstation. Discussion will focus on the concept of neutral body positioning which can reduce stress and strain on muscles, tendons and skeletal system and will reduce your risk of developing a musculoskeletal disorder (MSD).
