

2/6/2024 10AM OSHA Training for New CC Employees Part 1

Newly hired NC community college employees that require training in several important OSHA standards will find this two part series interesting and informative. Part 1 of this series will cover Chemical Hazard Communication, Bloodborne Pathogen Awareness, Fall Prevention and Ladder Safety. REGISTER HERE

2/20/2024 10AM OSHA Training for New Employees Part 2

Newly hired NC community college employees that require training in several important OSHA standards will find this two part series interesting and informative. Part 2 of this series will cover Personal Protective Equipment, Basic Electrical Safety, Fire Prevention, Fire Extinguishers usage and limitations

3/5/2024 10AM Hazard Recognition and Accident Prevention for Skilled Trades Instructors

Hazard Recognition for Skilled Trades Instructors will focus on identifying and eliminating hazards commonly found in CC shops in order to prevent injuries to instructors and students in the vocational curriculum. This two hour session will cover Electrical Safety, Fire prevention, Chemical labeling and storage, machine guarding, and Ladder safety.

3/19/2024 1:00 PM ARC Flash and Electrical Safety

This session will cover the basics of electrical safety and recognizing potential hazards in the workplace. Electrical Safety is focused on safety related work practices from Subpart "S". Training will include Arc Flash Awareness and will discuss the NFPA 70E 2015 standard, what an arc flash is, and proper work procedures and PPE to protect electrical workers.

4/2/2024 10AM Chemical Hygiene and Lab Safety

Intended for faculty members who work in our science labs, this webinar covers best practices for lab safety as required by OSHA 1910.1450. Attendees will learn about some of the most common hazards and safety violations found in CC science labs. In addition, employees will learn how to properly label chemicals and how OSHA's Hazard Communication standard applies to their area.

4/16/2024 10 AM Chemical Hazard Communication & Bloodborne Pathogens Exposure Prevention Refresher (for existing employees)

This course is a safety refresher for CC faculty and staff who have already received their initial CC safety training. It will include the OSHA required bloodborne pathogens awareness annual training. We will also review chemical safety, electrical safety, fall prevention, ladder safety, and go over a list of OSHA's most commonly cited violations.

5/7/2024 10AM Office Ergonomics

This session will cover principles that will help you create a comfortable and safe workstation. Discussion will focus on the concept of neutral body positioning which can reduce stress and strain on muscles, tendons and skeletal system and will reduce your risk of developing a musculoskeletal disorder (MSD).

5/28/2024 10AM Asbestos Awareness

This sessions will cover what asbestos is and where it is found. David will discuss the types of asbestos, how to protect from exposure and the removal of asbestos from buildings and other potential asbestos containing materials. He will include health effects of exposure and regulations regarding asbestos.

5/28/2024 1 PM – Groundskeeper Safety

This session will cover basic training on preventing employee injuries while doing groundskeeping tasks and using landscaping equipment.
